

State Route 347

Maricopa – MAG (Pinal County)

★ Congestion – This is a regionally significant highway that connects several communities. Over 57,000 vehicles travel on SR 347 every day, and 76% of households in the City of Maricopa commute on it daily.

★ Safety – In 2023, ADOT completed a road safety analysis that documented 967 crashes in a 5-year period, including 15 with at least one fatality and 21 with at least one serious injury. 53% of accidents were rear-end collisions, with most collisions occurring during peak hours. ADOT found that the root cause of rear end crashes and congestion is related to capacity constraints.

'She always had a positive attitude': Girl killed in SR 347 crash recalled
